JLG Telehandler

JLG Telehandler Training Guelph - In the late 1960's John L. Grove, with his wife Cora embarked on on a cross country excursion in their RV. Newly retired, after spending many years working with his brother to develop their crane company into an industry leader, John had no idea that fateful trip would permit JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision materials handling equipment was the end consequence of a road expedition.

Whilst on their journey, John spent time conversing with previous business associates whom the Groves stopped to visit along the way. These conversations combined with a tragic incident-two workers being electrocuted on scaffolding when the Groves were traveling to the Hoover Dam- John uncovered a substantial market for a product that could promptly and securely lift individuals in the air to accomplish upkeep and other building services.

After their return from vacation, John set up a joint venture with two of his friends and obtained a metal fabrication company in McConnellsburg, Pennsylvania. Starting with a small crew of twenty employees, they produced and sold their first JLG aerial work platform in 1970. The business incorporates some of the basic design essentials of that original lift into current designs.

JLG forklifts have come a ways from the time when Mr. John L. Grove returned to town from his cross-country road trip and since the first aerial work platform debuted on the market. Today, the company proudly continues to expand itself into various markets globally and develops new products to make certain consumers are capable of being more efficient and perform in the workplace within a safer atmosphere.
