Guelph Order Picker License

Guelph Order Picker License - Order preparation operation or order picking as it is more normally known is a process utilized within warehouse operations and comprises staff called order pickers. The order picker's job is to collect and take articles in specific quantities in order to fulfill the customer's orders prior to shipment. Order picking is an easy warehousing process. The effectiveness in which this task is accomplished can be directly related to the productivity of a supply chain. Thus, order picking is one of the most controlled logistic processes. Order picking falls within the category of the warehouse management system.

There are particular kinds of order picking which comprise: wave picking method, pick to box method, piece picking or picker to part method, zone picking method and sorting systems method.

The pick to box method comprises the order picker just filling the boxes with item that are from their specific station. The box then moves on to other stations to until the order is done. In this technique, there is no movement of the order picker employees. In the wave picking method, the order pickers move about to be able to gather the required items for some orders. The picker to part method or piece picking is similar where the order picker or pickers move in order to collect the stuff required but for one order only.

There is no movement by the order picker in the sorting systems method. Rather, stuff are delivered to the orderpicker by an automatic system such as an automatic storage system or a conveyor system. In the zone picking method, each and every order picker is assigned to one particular zone. They are responsible for just realizing order picking in this specific area.
